- Movie Editor ( level = 80 )
- Make promotional clips ( level = 80 )
- Team Work ( level = 90 )
- trip ( level = 80 )

- **2014 – now Ideas for Smart Homes**

Smart home and building is something I am extremely interested in. In this system, we provide services to customers that the user can do all his work and services at home with his mobile phone. For example, turn off the light. Lock the doors. Close the curtains. Water the garden. This is almost new in Iran, but it has been welcomed. This requires a lot of thought and focus. It requires a lot of creativity. Different companies do this, and we do it part-time.

- **2014-now Web Design**

Website design is also very enjoyable for me. Because every time I get acquainted with a new challenge, it makes my brain update. Because technology is advancing every day. I designed many sites. I do this as a freelancer. When I have free time, I try to design a site.

- **2012–2015 FZACo Registering Quality Control Statistics**

Zob Amal Steel Company is located in Mazandaran province. The company produced auto parts. Such as wheel discs, wheel handlebars, car room arm, car crankshaft, and ... I worked in the statistics department. Due to the bad economy of Iran at that time, the managers decided to fire me along with 83 other people from the company and cancel our contract. It was very difficult for me, but I was not disappointed.

### Types of locomotives

- General Motors diesel locomotive 22
- General Motors diesel locomotive 26
- Gt26 Cw2a
- Siemens diesel locomotive
- Hitachi locomotive

### The countries I traveled to

- Georgia
- Turkey
